Apple Inc. is an American multinational corporation that designs and markets consumer electronics, computer software, and personal computers. The company's best-known hardware products include the Macintosh line of computers, the iPod, the iPhone and the iPad.

Apple generated \$65 billion of revenue last year. That's bigger than the GDP of Iraq, Croatia, Libya, Ecuador, and more than 100 other countries

A G Brown Ltd have completed the steel fabrication works on the recently opened new Apple store at Glasgow's Braehead Shopping Centre. This was a particularly tricky project to undertake as our customer required A G Brown Ltd to remove 3 existing beams in the centre of the store that were loaded with 500 tonnes including the glass roof of the shopping centre, A G Brown Ltd had to transfer the 500 tonnes weight by fabricating and installing various beams up to 25 tonne to transfer the weight along the ceiling and down the outside of the shop leaving a completely open space as you can now see in the finished Apple Shop as shown in the above photo.
